

Why HDR?

HIGHER QUALITY

HDR Photography is an enhanced photo technique that is extremely effective in delivering the highest quality photographs, that most accurately portray how the human eye would see it live and in person.

BETTER EXPERIENCE

With HDR Photography, buyers have a more enticing experience which will result in a higher perceived value of the home.

MORE DETAIL

Notice with Standard HD how the light washes out a majority of the details inside the room and outside the window.

Importance of HDR Done Right

As with anything, there is a delicate balance of 'not enough' and 'too much'. To perform HDR correctly, it takes a delicate and artistic balance which, when upheld to Wingman Imagery's standards, yields the perfect blend of technology and visually pleasing picture qualities to enhance the presence of the property, and the realtor who's listing it.
